

Chemical Engineering Technician Interview Questions

1. Would you consider analyzing data or information a strength? How so?

2. Share an effective method you have used to ensure that product quality complies with standards and specifications.

3. Share an experience in which you successfully shared a difficult piece of information. (Make sure that the candidate has open lines of communication.)

4. Tell me how you organize, plan, and prioritize your work.

5. Share an experience when you applied new technology or information in your job. How did it help your company?

6. In your experience, what is the key to ensuring your company was compliant with all laws, regulations and standards that were applicable to your area of responsibility?

7. Share an effective approach to working with a large amount of information/data. How has your approach affected your company?

8. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

9. Tell me about the last time you monitored or reviewed information and detected a problem. How did you respond?

10. Share an example of a time you had to gather information from multiple sources. How did you determine which information was relevant?

11. Share a time when you successfully used scientific rules or methods to solve a problem at work.

12. Share an experience you had in dealing with a difficult person and how you handled the situation.

13. Share an experience in which your attention to detail and thoroughness had an impact on your last company.

Chemical Engineering Technician Interview Questions

14. Provide an effective method you have used to compile and interpret results of tests and analyses.

15. Name a time when you identified strengths and weaknesses of alternative solutions to problems. What was the impact?

16. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.

17. What techniques have you used to conduct chemical experiments, tests, and analyses? Provide an experience.

18. Tell me about a recent experience you've had working with your hands.

19. Share an experience in which you successfully conducted laboratory tests and assisted scientists in making analyses of materials.

20. What have you found to be the best way to monitor the performance of your work and/or the work of others? Share a time when you had to take corrective action.

21. How would you rate your writing skills? (Ask for an example that demonstrates great writing skills.)

22. Describe an effective program of sampling or analysis you developed which helped you to maintain quality standards of materials and products.

23. Share an experience in which you prepared chemical solutions for products and/or processes. What methods made you successful?

24. Provide an effective method you have used to provide and/or maintain a safe work environment.

25. Share an experience in which you successfully operated experimental pilot plants.

26. Describe an effective technique you have used to maintain the cleanliness of laboratory instruments and equipment.

Chemical Engineering Technician Interview Questions

27. Share an example of when you went above and beyond the "call of duty". (Look for answers that show the candidate is dependable.)

28. How do you balance cooperation with others and independent thinking? Share an example. (Try to determine if the candidate has a cooperative attitude or is otherwise good-natured.)

29. What is the state of your reports and documentation? Name one thing you would like to improve.

30. Provide an example of a time when you were able to demonstrate excellent listening skills. What was the situation and outcome?

31. Provide an example when your ethics were tested.

32. Describe an experimental apparatus you designed which helped you to develop a new product or process.

33. Tell me about an effective chemical engineering process or production technique which you developed.

34. Share an experience in which you effectively provided technical support to a chemist or engineer.

35. Provide a time when you worked in a rapidly evolving workplace. How did you deal with the change? (Make sure the candidate is flexible.)

36. Name a time when your patience was tested. How did you keep your emotions in check?

37. Provide an experience in which you successfully directed other workers. What methods made you successful?

38. Tell me about a time when you developed your own way of doing things or were self-motivated to finish an important task.

39. Provide an experience in which you were sensitive to someone's needs or feelings. How did your helpfulness affect your work environment?

Chemical Engineering Technician Interview Questions

40. Share an experience in which you've successfully learned how to handle a new piece of equipment?

41. Give me an example of when you thought outside of the box. How did it help your employer?

42. Share a time when you willingly took on additional responsibilities or challenges. How did you successfully meet all of the demands of these responsibilities? (Make sure the candidate is a self-starter and can demonstrate some initiative.)

43. Describe an experience in which you identified the educational needs of your students and successfully developed a way to teach/train them.

44. Provide an experience that demonstrates your ability to manage time effectively. What were the challenges and results?

45. Share an experience in which you conducted a test of a product, service, or process and successfully improved the quality or performance.

46. Please share an experience in which you presented to a group. What was the situation and how did it go?

47. Provide an example of when you were persistent in the face of obstacles.

48. Provide a time when you were able to identify a complex problem, evaluate the options, and implement a solution. How did the solution benefit your employer?

49. Share an experience in which you successfully coordinated with others. How about a coordination effort that was not as successful?

50. Share an example of when you established and accomplished a goal that was personally challenging. What helped you succeed?

51. Share an experience in which your understanding of a current or upcoming problem helped your company to respond to the problem.

Chemical Engineering Technician Interview Questions

52. Name a time when your creativity or alternative thinking solved a problem in your workplace.

53. Provide a time when you dealt calmly and effectively with a high-stress situation.

54. Share an experience in which your willingness to lead or offer an opinion helped your company.

55. Share an experience in which your ability to consider the costs or benefits of a potential action helped you choose the most appropriate action.

56. What are some long-range objectives that you developed in your last job? What did you do to achieve them?

57. Describe a time when you successfully provided personal assistance to a coworker or patron.

58. Please share an experience in which you successfully taught a difficult principle or concept. How were you able to be successful?

59. How do you stay fit in order to perform physical activities that are required in the workplace?

60. In your experience, what is the key to developing a good team? (Look for how they build mutual trust, respect, and cooperation.)

61. Share an experience in which personal connections to coworkers or others helped you to be successful in your work. (Make sure candidate works well with others.)

62. Tell me about the last time you oversaw the work of someone else. How did you effectively motivate, develop, and direct the worker(s)?

63. Share an experience in which you used new training skills, ideas, or a method to adapt to a new situation or improve an ongoing one. (Look for the candidate's ability to learn.)

64. Describe a time when you successfully serviced, repaired, calibrated, or tested a device that operates mainly by electronic principles.

Chemical Engineering Technician Interview Questions

65. Describe a time when you successfully serviced, repaired, or tested a machine or device that operates mainly by mechanical principles.

66. Tell me about a time when you successfully determined the cause of an operating error at your company and solved the problem.

67. Describe a time when you were able to select the best tool to do a job. How did you use reasoning skills to make the best choice?

68. Tell me about a time when your ability to analyze needs and product requirements helped you create an effective design or make an informed decision to benefit your company.

69. Provide an experience in which your ability to actively find ways to help people improved your company or your own work ethic.

70. Provide an example when you were able to prevent a problem because you foresaw the reaction of another person.

71. Tell me about your last experience doing repair work. How did you determine what tools you needed?

72. Tell me about the last time you performed routine maintenance on equipment. How did you determine when and what type of work was needed?

73. Describe an experience in which you successfully controlled the operation of a difficult system. What made you successful?

74. Please share with me an example of how you helped coach or mentor someone. What improvements did you see in the person's knowledge or skills?

75. Provide an example of a time when you successfully organized a diverse group of people to accomplish a task.
