33. Provide your experience programming computers and electronic instruments.
34. Tell me about a time when you successfully determined the cause of an operating error at your company and solved the problem.
35. Tell me about effective work procedures which you established for fabricating new structural products.
36. In your experience, what is the key to ensuring your company was compliant with all laws, regulations and standards that were applicable to your area of responsibility?
37. Provide an example when your ethics were tested.

Operator And Programmer (computer Numerically Controlled Operator And Programmer) Interview Questions

38. Share a time when you willingly took on additional responsibilities or challenges. How did you successfully meet all of the demands of these responsibilities? (Make sure the candidate is a self-starter and can demonstrate some initiative.)

39. Describe a time when you successfully serviced, repaired, or tested a machine or device that operates mainly by mechanical principles.

40. Provide a time when you worked in a rapidly evolving workplace. How did you deal with the change? (Make sure the candidate is flexible.)

41. Share your experience fitting and assembling parts to make or repair machine tools.

42. Tell me about an effective fixture, tooling, or experimental part which you designed to meet a special engineering need.

43. Name a time when your patience was tested. How did you keep your emotions in check?

44. Provide an example of when you were persistent in the face of obstacles.

45. Provide your experience dismantling machines and equipment and replacing defective parts.

46. Describe your experience setting up and operating metalworking, brazing, heat-treating, welding, and/or cutting equipment.

47. Share an effective approach to working with a large amount of information/data. How has your approach affected your company?

48. Provide a time when you dealt calmly and effectively with a high-stress situation.

49. Share an experience in which your willingness to lead or offer an opinion helped your company.

50. Share an example of when you established and accomplished a goal that was personally challenging. What helped you succeed?

Operator And Programmer (computer Numerically Controlled Operator And Programmer) Interview Questions

51. Tell me about the last time you performed routine maintenance on equipment. How did you determine when and what type of work was needed?

52. Name a time when you identified strengths and weaknesses of alternative solutions to problems. What was the impact?

53. Name a time when your creativity or alternative thinking solved a problem in your workplace.

54. Share an experience in which you recommended a change to experimental procedures which improved efficiency or adaptability to setup and production.

55. Share an experience in which you oversaw the assembly, fabrication, construction, maintenance, or modification of equipment. How did you communicate to the staff what you wanted?

56. Provide an experience in which you were sensitive to someone's needs or feelings. How did your helpfulness affect your work environment?

57. Share an experience in which you installed repaired parts into equipment and/or new equipment.

58. Provide an effective method you have used to advise clients about the materials being used for products.

59. Share an experience in which you effectively prepared sketches for the illustration of product appearance.

60. Share an experience in which you supported a metalworking project through planning, fabrication, assembly, inspection, and/or testing. How did your knowledge of machine functions, metal properties, and mathematics help you to be effective?

61. Share an experience in which your ability to consider the costs or benefits of a potential action helped you choose the most appropriate action.

62. Provide a time when you were able to identify a complex problem, evaluate the options, and implement a solution. How did the solution benefit your employer?

63. Provide an experience in which you tested experimental models under simulated operating conditions.

64. Share an experience in which personal connections to coworkers or others helped you to be successful in your work. (Make sure candidate works well with others.)
65. Share an experience in which you installed experimental parts or assemblies into machines or mechanisms.
66. Tell me about your last experience doing repair work. How did you determine what tools you needed?
67. Describe a time when you were able to select the best tool to do a job. How did you use reasoning skills to make the best choice?
68. Share an experience in which you successfully coordinated with others. How about a coordination effort that was not as successful?
69. Would you consider analyzing data or information a strength? How so?
70. Provide an experience that demonstrates your ability to manage time effectively. What were the challenges and results?
71. Share an experience you had in dealing with a difficult person and how you handled the situation.
72. Share an experience in which your understanding of a current or upcoming problem helped your company to respond to the problem.
73. Please share an experience in which you presented to a group. What was the situation and how did it go?
74. Provide an example of a time when you were able to demonstrate excellent listening skills. What was the situation and outcome?
75. Please share with me an example of how you helped coach or mentor someone. What improvements did you see in the person's knowledge or skills?
76. What are some long-range objectives that you developed in your last job? What did you do to achieve

them?

77. Describe a time when you successfully serviced, repaired, calibrated, or tested a device that operates mainly by electronic principles.

78. Tell me about a time when your ability to analyze needs and product requirements helped you create an effective design or make an informed decision to benefit your company.

79. Provide an example when you were able to prevent a problem because you foresaw the reaction of another person.

80. Share an experience in which you used new training skills, ideas, or a method to adapt to a new situation or improve an ongoing one. (Look for the candidate's ability to learn.)

81. Describe an experience in which you identified the educational needs of your students and successfully developed a way to teach/train them.

82. Please share an experience in which you successfully taught a difficult principle or concept. How were you able to be successful?
