52. Tell me about the last time you oversaw the work of someone else. How did you effectively motivate, develop, and direct the worker(s)?

53. Please share with me an example of how you helped coach or mentor someone. What improvements did you see in the person's knowledge or skills?

54. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

55. Share an experience in which successful communication with vendors helped you increase your knowledge or solve a problem in your work.

56. How do you keep up with changes in technology? How has this benefited you in your work?

57. Share an experience in which the use of network computer-aided design helped you optimize a network design.

58. Describe an experience in which you successfully supervised a staff working on the design or implementation of a network solution. What methods made you a successful supervisor?

59. Share an effective method you have used to determine performance and interoperability of new or modified hardware/software products.

60. What methods do you use to prepare project schedules, budgets, and cost control systems? Provide an experience.

61. Describe an effective detailed network specification which you prepared.

62. Describe a design presentation or proposal you prepared which you were happy with. How about one you

Wireless Network Engineer Interview Questions

were unhappy with?

63. Provide an experience in which your participation in a network technology upgrade or expansion project benefited your company.

64. Share an experience in which monitoring or analyzing network performance helped you in your work.

65. Provide an effective method you have used to maintain network peripherals.

66. Share an effective method you have used to explain design specifications to integration and test engineers.

67. How do you ensure that customer requirements are met efficiently and effectively?

68. What methods do you use to estimate the time and materials needed to complete a project? Provide an experience.

69. Provide a description of a plan or budget you developed for network equipment replacement.

70. Tell me about a network security measure you developed.

71. Describe a project reporting system which you developed and/or maintained.

72. What is the state of your documentation? What is one thing you would like to improve in your documentation?

73. Tell me about a disaster recovery plan you developed.

74. Describe a conceptual, logical, or physical network design which you developed.

75. Describe procedures you developed for installation, use, or troubleshooting of communications hardware or software.

76. Tell me about a successful solution you developed and/or implemented for a network problem.

Wireless Network Engineer Interview Questions

77. How do you determine specific network hardware and software requirements?

78. Describe a successful product awareness, skills transfer, or product education session you designed, organized, and/or delivered. What methods led to your success?

79. Tell me about an equipment configuration prototype you designed and/or built. Name one thing you could have done better.

80. Describe an effective method you have used to coordinate network and design activities with designers of associated networks.

81. Provide a time when you coordinated network operations. How do you determine when networks need maintenance, repairs, or upgrades?

82. Share an experience in which you successfully coordinated installation of new equipment.

83. Provide an experience in which you helped a user solve an operational problem. How did you diagnose the problem?

84. Share an effective communication method you have used to determine customer needs, e.g. communicating with marketing staff.

85. Share an experience in which you successfully adjusted a network size to meet volume or capacity demands.

86. Provide an example when you were able to prevent a problem because you foresaw the reaction of another person.

87. Share an experience in which personal connections to coworkers or others helped you to be successful in your work. (Make sure candidate works well with others.)

88. What is the most challenging part of budgeting for you?

Wireless Network Engineer Interview Questions

89. Share a time when you successfully used scientific rules or methods to solve a problem at work.

90. Provide an example of when you set expectations and monitored the performance of subordinates. What guidance and direction did you find most effective?

91. Share an example of a time you had to gather information from multiple sources. How did you determine which information was relevant?

92. Describe an experience in which your ability to work well with others and reconcile differences helped your company or employer. (Make sure the candidate knows how to negotiate.)

93. Share an experience in which you oversaw the assembly, fabrication, construction, maintenance, or modification of equipment. How did you communicate to the staff what you wanted?

94. Tell me about the last time you performed routine maintenance on equipment. How did you determine when and what type of work was needed?
