

Wheel Borer Interview Questions

1. Share an effective approach to verify conformance of machined work to specifications, using measuring instruments, such as calipers, micrometers, or fixed or telescoping gauges.

2. What kind of experience do you have studying machining instructions, job orders, or blueprints to determine dimensional or finish specifications, sequences of operations, setups, or tooling requirements?

3. Tell me how you select and set cutting speeds, feed rates, depths of cuts, and cutting tools, according to machining instructions or knowledge of metal properties.

4. Share an experience in which you've successfully learned how to handle a new piece of equipment?

5. Tell me about a recent experience you've had working with your hands.

6. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.

7. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

8. Share an experience in which your attention to detail and thoroughness had an impact on your last company.

9. Share an example of when you went above and beyond the "call of duty". (Look for answers that show the candidate is dependable.)

10. Share an experience you had in dealing with a difficult person and how you handled the situation.
