

## Sanitation Engineer Interview Questions

1. Tell me about a time when your ability to analyze needs and product requirements helped you create an effective design or make an informed decision to benefit your company.

2. Share an effective approach to working with a large amount of information/data. How has your approach affected your company?

3. What kind of experience do you have designing or supervising the design of systems, processes, or equipment for control, management, or remediation of water, air, or soil quality?

4. Walk me through how you collaborate with environmental scientists, planners, hazardous waste technicians, engineers, and other specialists, and experts in law and business to address environmental problems.

5. Share an experience you had in dealing with a difficult person and how you handled the situation.

6. Tell me how you organize, plan, and prioritize your work.

7. What are some long-range objectives that you developed in your last job? What did you do to achieve them?

8. Share an experience when you applied new technology or information in your job. How did it help your company?

9. Give me an example of when you thought outside of the box. How did it help your employer?

10. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.
