1. Share an experience in which you've successfully learned how to handle a new piece of equipment?

2. Tell me about a recent experience you've had working with your hands.

3. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

4. Walk me through how you would set up, operate, or tend presses and forging machines to perform hot or cold forging by flattening, straightening, bending, cutting, piercing, or other operations to taper, shape, or form metal.

5. What is the most challenging part of measuring and inspecting machined parts to ensure conformance to product specifications?

6. What have you found to be the best way to read work orders or blueprints to determine specified tolerances and sequences of operations for machine setup?

7. Share an example of a time you had to gather information from multiple sources. How did you determine which information was relevant?

8. Share an experience when you applied new technology or information in your job. How did it help your company?

9. Share with me your knowledge when it comes to turning handles or knobs to set pressures and depths of ram strokes and to synchronize machine operations.

10. Share an example of when you went above and beyond the "call of duty". (Look for answers that show the candidate is dependable.)
