

Computational Geneticist Interview Questions

1. Please share with me an example of how you helped coach or mentor someone. What improvements did you see in the person's knowledge or skills?

2. What kind of experience do you have planning or conducting basic genomic and biological research related to areas such as regulation of gene expression, protein interactions, metabolic networks, and nucleic acid or protein complexes?

3. How do you stay up to date with scientific literature to select and modify methods and procedures most appropriate for genetic research goals?

4. Share your approach to review, approve, or interpret genetic laboratory results.

5. Describe an experience in which you identified the educational needs of your students and successfully developed a way to teach/train them.

6. Share an experience you had in dealing with a difficult person and how you handled the situation.

7. Tell me how you organize, plan, and prioritize your work.

8. What are some long-range objectives that you developed in your last job? What did you do to achieve them?

9. Give me an example of when you thought outside of the box. How did it help your employer?

10. Would you consider analyzing data or information a strength? How so?
