

Geographic Information Systems Physical Scientist (gis Physical Scientist) Interview Questions

1. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.
2. Tell me about the last time you produced data layers, maps, tables, or reports, using spatial analysis procedures or Geographic Information Systems (GIS) technology, equipment, or systems.
3. Walk me through how you would coordinate the development or administration of Geographic Information Systems (GIS) projects, including the development of technical priorities, client reporting and interface, or coordination and review of schedules and budgets.
4. Tell me how you organize, plan, and prioritize your work.
5. Give me an example of when you thought outside of the box. How did it help your employer?
6. Share an example of a time you had to gather information from multiple sources. How did you determine which information was relevant?
7. Share a time when you successfully used scientific rules or methods to solve a problem at work.
8. What are some long-range objectives that you developed in your last job? What did you do to achieve them?
9. How would you rate your writing skills? (Ask for an example that demonstrates great writing skills.)
10. Provide an example of a time when you were able to demonstrate excellent listening skills. What was the situation and outcome?
