

Hydrologic Engineer Interview Questions

1. Name a time when your advice to management led to an improvement in your company or otherwise helped your employer.

2. Walk me through how you would design and conduct scientific hydrogeological investigations to ensure that accurate and appropriate information is available for use in water resource management decisions.

3. Describe methods you have found effective to evaluate data and provide recommendations regarding the feasibility of municipal projects, such as hydroelectric power plants, irrigation systems, flood warning systems, and waste treatment facilities.

4. Share an experience you had in dealing with a difficult person and how you handled the situation.

5. Tell me how you organize, plan, and prioritize your work.

6. Share an experience when you applied new technology or information in your job. How did it help your company?

7. Give me an example of when you thought outside of the box. How did it help your employer?

8. Would you consider analyzing data or information a strength? How so?

9. Share an effective approach to working with a large amount of information/data. How has your approach affected your company?

10. Tell me about the last time you monitored or reviewed information and detected a problem. How did you respond?
