

Manufacturing Associate Interview Questions

1. Tell me about your qualifications for and your experience handling vehicles and/or mechanized equipment.

2. Describe methods you have found effective to monitor machine cycles and mill operation to detect jamming and to ensure that products conform to specifications.

3. Walk me through how you would examine, inspect, and measure raw materials and finished products to verify conformance to specifications.

4. Share an experience in which you've successfully learned how to handle a new piece of equipment?

5. Tell me about a recent experience you've had working with your hands.

6. Share an experience when you applied new technology or information in your job. How did it help your company?

7. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

8. Tell me about the last time you monitored or reviewed information and detected a problem. How did you respond?

9. Describe an experience in which you successfully controlled the operation of a difficult system. What made you successful?

10. Tell me how you organize, plan, and prioritize your work.
