

Protozoologist Interview Questions

1. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.

2. Describe an experience when you studied animals in their natural habitats, assessing effects of environment and industry on animals, interpreting findings and recommending alternative operating conditions for industry.

3. Describe effective methods to inventory or estimate plant and wildlife populations.

4. Share an experience you had in dealing with a difficult person and how you handled the situation.

5. Tell me how you organize, plan, and prioritize your work.

6. What are some long-range objectives that you developed in your last job? What did you do to achieve them?

7. Give me an example of when you thought outside of the box. How did it help your employer?

8. Would you consider analyzing data or information a strength? How so?

9. Share an example of a time you had to gather information from multiple sources. How did you determine which information was relevant?

10. Share a time when you successfully used scientific rules or methods to solve a problem at work.
