## Cardiac Catheterization Laboratory Technologist Interview Questions

1. Walk me through how you conduct electrocardiogram (EKG), phonocardiogram, echocardiogram, stress
testing, or other cardiovascular tests to record patients' cardiac activity, using specialized electronic test
equipment, recording devices, or laboratory instruments.
2. Describe what method have you found most useful to monitor patients' blood pressure and heart rate using
electrocardiogram (EKG) equipment during diagnostic or therapeutic procedures to notify the physician if
something appears wrong?
3. What is the most challenging part of monitoring patients' comfort and safety during tests, alerting
physicians to abnormalities or changes in patient responses?
4. Tell me about your experience when adjusting equipment and controls according to physicians' orders or
established protocol.
5. Share an experience you had in dealing with a difficult person and how you handled the situation.
6. Share an experience in which you successfully shared a difficult piece of information. (Make sure that the
candidate has open lines of communication.)
7. How do you stay fit in order to perform physical activities that are required in the workplace?
8. Tell me how you organize, plan, and prioritize your work.
9. Share an experience when you applied new technology or information in your job. How did it help your company?
10. Tell me about an experience in which you analyzed information and evaluated results to choose the best
solution to a problem.
11. Tell me about the last time you monitored or reviewed information and detected a problem. How did you
respond?
12. Share an example of a time you had to gather information from multiple sources. How did you determine
which information was relevant?
