

## Tipple Oiler Interview Questions

1. Describe a time when you successfully serviced, repaired, or tested a machine or device that operates mainly by mechanical principles.

2. Share an experience in which you've successfully learned how to handle a new piece of equipment?

3. What kind of experience do you have installing, replacing, or changing machine parts and attachments, according to production specifications?

4. Walk me through how you start machines and observe mechanical operation to determine efficiency and to detect problems.

5. Tell me about a recent experience you've had working with your hands.

6. Share an experience when you applied new technology or information in your job. How did it help your company?

7. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

8. Tell me about the last time you monitored or reviewed information and detected a problem. How did you respond?

9. Give me an example of when you thought outside of the box. How did it help your employer?

10. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.

11. Tell me about the last time you performed routine maintenance on equipment. How did you determine when and what type of work was needed?

12. Share an experience you had in dealing with a difficult person and how you handled the situation.

13. Tell me about a time when you successfully determined the cause of an operating error at your company and solved the problem.

## Tipple Oiler Interview Questions

14. Tell me how you organize, plan, and prioritize your work.
15. Share an experience in which your attention to detail and thoroughness had an impact on your last company.
16. Name a time when you lubricated or applied adhesives or other materials to machines, machine parts, or other equipment, according to specified procedures.
17. Share your approach when inspecting or testing damaged machine parts, and marking defective areas or advising supervisors of repair needs.
18. Tell me about a time when you developed your own way of doing things or were self-motivated to finish an important task.
19. Share an example of when you went above and beyond the "call of duty". (Look for answers that show the candidate is dependable.)
20. What is the most challenging part of dismantling machines and removing parts for repair, using hand tools, chain falls, jacks, cranes, or hoists?
