

## Electric Stop Installer Interview Questions

1. Tell me how you organize, plan, and prioritize your work.

2. Share your experience repairing and replacing wiring, equipment, and/or fixtures.

3. Share an experience in which you successfully shared a difficult piece of information. (Make sure that the candidate has open lines of communication.)

4. Describe a time when you successfully serviced, repaired, calibrated, or tested a device that operates mainly by electronic principles.

5. Tell me about a recent experience you've had working with your hands.

6. How do you stay fit in order to perform physical activities that are required in the workplace?

7. Share an experience when you applied new technology or information in your job. How did it help your company?

8. Tell me about an experience in which you analyzed information and evaluated results to choose the best solution to a problem.

9. Share an experience in which your diligence of inspecting equipment, structures, or materials helped you identify a problem or the cause of a problem.

10. Tell me about the last time you monitored or reviewed information and detected a problem. How did you respond?

11. Share an experience in which you've successfully learned how to handle a new piece of equipment?

12. Share an example of a time you had to gather information from multiple sources. How did you determine which information was relevant?

13. Tell me about a time when you successfully determined the cause of an operating error at your company and solved the problem.

## Electric Stop Installer Interview Questions

14. Share an experience in which your attention to detail and thoroughness had an impact on your last company.

15. Share an experience you had in dealing with a difficult person and how you handled the situation.

16. In your experience, what is the key to ensuring your company was compliant with all laws, regulations and standards that were applicable to your area of responsibility?

17. Tell me about your last experience doing repair work. How did you determine what tools you needed?

18. Share an example of when you went above and beyond the "call of duty". (Look for answers that show the candidate is dependable.)

19. How do you balance cooperation with others and independent thinking? Share an example. (Try to determine if the candidate has a cooperative attitude or is otherwise good-natured.)

20. Share an experience in which your willingness to lead or offer an opinion helped your company.

21. Describe your experience assembling, installing, testing, and/or maintaining various electrical parts.

22. Share an experience in which you conducted a test of a product, service, or process and successfully improved the quality or performance.

23. Provide an example when your ethics were tested.

24. What factors do you consider when planning layouts and installation of electrical wiring, equipment, and fixtures?

25. Tell me about the various tools and equipment you have used.

26. Share your experience using testing devices to ensure compatibility and safety of systems.

27. Share an experience in which you trained workers in electrical work. What methods made you successful?

## Electric Stop Installer Interview Questions

28. Describe the methods you have used to determine the location of wiring and equipment and to ensure conformance to codes.

29. Provide an experience in which you diagnosed a malfunctioning system, apparatus, or component and resolved the problem.

30. Share a time when you willingly took on additional responsibilities or challenges. How did you successfully meet all of the demands of these responsibilities? (Make sure the candidate is a self-starter and can demonstrate some initiative.)
